

Push Up Loft Access Door

CODE **GL260**

Operating Instructions:

To open the door, simply pull the two locking catches in towards the centre of the door to release from the frame. Push the door upwards into the loft space and place to one side for unrestricted access alternatively the door can be totally removed if required.

To replace the door position over the opening ensuring the catches are in line with the locking apertures in the frame. With the catches still pushed into the centre of the door allow the door to be lowered back into the frame. Check the door is correctly positioned and aligned in the frame and push the locking catches outwards to lock the door into position as shown.
